

EFFECTIVE DATE: 01|01|2020
POLICY LAST UPDATED: 10|01|2019

OVERVIEW

This policy is applicable to all plans in which acupuncture services are a covered benefit.

For Commercial Products, Acupuncture services are not available as a standard benefit, but are available as mandated by Rhode Island General Law (RIGL) 27-20-42 (see full text below). This policy is written to reflect the coverage as it applies to Commercial groups that purchase a plan with acupuncture services.

For selected Medicare Advantage products, acupuncture services are covered. However, benefits must be verified for Medicare Advantage members to ensure they have a plan that includes Acupuncture services.

POLICY STATEMENT

BlueCHiP for Medicare and Commercial Products

Acupuncture and an initial evaluation (for a new patient) is covered when rendered by a licensed doctor of acupuncture (D. Ac.) or physician (State of Rhode Island-licensed MD or DO)* only. Acupuncture assistants are not recognized for separate reimbursement and are therefore considered inclusive of the acupuncture reimbursement.

An initial evaluation (99201-99205) is allowed only for new patients. According to CPT guidelines, a new patient is one who has not received any professional services from the physician within the past three years.

The following services are not covered:

- Acupuncture with electrical stimulation;
- Adjunctive therapies, such as but not limited to moxibustion, herbs, oriental massage, etc.;
- Acupuncture when used as an anesthetic during a surgical procedure;
- Precious metal needles (e.g., gold, silver, etc.);
- Acupuncture in lieu of anesthesia;
- Any other service not specifically listed as a covered service.

*Acupuncture services may be rendered by a physician (MD or DO) when the following Rhode Island Department of Health criteria has been met:

2.2 Any physician licensed in Rhode Island under the provisions of Chapter 5-37 who seeks to practice medical acupuncture as a therapy shall comply with the following:

2.2.1 Meet the requirements for licensure as a doctor of acupuncture set forth in the *Rules and Regulations for Licensing Doctors of Acupuncture and Acupuncture Assistants* promulgated by the Department of Health; **or**

2.2.2 Successfully complete a course offered to physicians that meets the requirements set forth in these regulations and includes no less than the following:

- a) a minimum of three hundred (300) hours of formal instruction;
- b) a supervised clinical practicum incorporated into the formal instruction required in subsection 2.2.2(a) (above).

COVERAGE

BlueCHiP for Medicare

Acupuncture is a covered service for selected Medicare Advantage members/products. Please refer to the member's Evidence of Coverage for applicable acupuncture benefits/coverage.

Commercial Products

Acupuncture is a covered benefit for those groups who have purchased a plan with an acupuncture benefit. Please refer to the appropriate Benefit Booklet, Evidence of Coverage, or Subscriber Agreement for applicable acupuncture benefits/coverage.

BACKGROUND

Acupuncture is the practice of piercing the skin with needles at specific body sites to induce anesthesia, to relieve pain, to treat various nonpainful disorders, and to alleviate withdrawal symptoms of opioid dependence. Acupuncture has also been used or proposed for a large variety of indications.

Acupuncture is a traditional form of Chinese medical treatment that has been practiced for over 2000 years. It involves piercing the skin with needles at specific body sites. The placement of needles into the skin is dictated by the location of meridians. These meridians, or channels, are thought to mark patterns of energy, called Qi (Chi), which flow through the human body. According to traditional Chinese philosophy, illness occurs when the energy flow is blocked or unbalanced, and acupuncture is a way to influence chi and restore balance. Another tenet of this philosophy is that all disorders are associated with specific points on the body, on or below the skin surface.

Several physiologic explanations of acupuncture's mechanism of action have been proposed including an analgesic effect from release of endorphins or hormones (eg, cortisol, oxytocin), a biomechanical effect, and/or an electromagnetic effect.

There are 361 classical acupuncture points located along 14 meridians, and different points are stimulated depending on the condition treated. In addition to traditional Chinese acupuncture, there are a number of modern styles of acupuncture, including Korean and Japanese acupuncture. Modern acupuncture techniques can involve stimulation of additional non-meridian acupuncture points. Acupuncture is sometimes used along with manual pressure, heat (moxibustion), or electrical stimulation (electroacupuncture). Acupuncture treatment can vary by style and by practitioner, and is generally personalized to the patient. Thus, patients with the same condition may receive stimulation of different acupuncture points.

Scientific study of acupuncture is challenging due to the multifactorial nature of the intervention, variability in practice, and individualization of treatment. There has been much discussion in the literature on the ideal control condition for studying acupuncture. Ideally, the control condition should be able to help distinguish between specific effects of the treatment and nonspecific placebo effects related to factors such as patient expectations and beliefs and the patient-provider therapeutic relationships. A complicating factor in selection of a control treatment is that it is not clear whether all 4 components (ie, the acupuncture needles, the target location defined by traditional Chinese medicine, the depth of insertion, and the stimulation of the inserted needle) are necessary for efficacy.

§ 27-20-42 Acupuncture services. – (a) Every group health insurance contract, plan, or group policy delivered, issued for delivery or renewed in this state which provides medical coverage, and every group policy which provides for treatment of persons for the prevention, cure or correction of any illness or physical or mental condition shall provide, as an optional rider, coverage for the services of a doctor of acupuncture as a provider of acupuncture services.

(b) For the purposes of this section:

(1) "Doctor of acupuncture" means a practitioner licensed under chapter 37.2 of title 5.

(2) "Coverage for the services of a doctor of acupuncture as a provider of acupuncture services" means coverage for acupuncture as defined in § 5-37.2-2(1).

(c) It remains within the sole discretion of the non-profit medical service corporation as to which doctor of acupuncture it contracts with. Reimbursement is provided according to the respective principles and policies of the non-profit medical service corporation; provided, that no non-profit medical service corporation may be required to pay for duplicative services actually rendered by a doctor of acupuncture and any other health care provider. Nothing contained in this section precludes non-profit medical service corporations from conducting managed care, medical necessity or utilization review.

Note: Rhode Island-mandated benefits do not apply to Plan 65, FEHBP, and Medicare Advantage plans. Self-funded groups may or may not choose to follow state mandate(s).

CODING

BlueCHiP for Medicare and Commercial Products

Local providers in the Acupuncture Specialty (053) are able to file only the codes found in this policy.

Providers should not file an E & M service on the same date of service as the acupuncture service unless it meets the definition for use of Modifier -25. The acupuncture codes and services 97810, 97811 include pre-service, intra-service and post-service evaluation and management for the typical following factors of history, evaluation, management and chart documentation done as part of the overall daily treatment.

The following CPT codes are covered when a plan with acupuncture services has been purchased:

97810 Acupuncture, 1 or more needles; without electrical stimulation, initial 15 minutes of personal one-on-one contact with the patient

97811 Acupuncture, 1 or more needles; without electrical stimulation, each additional 15 minutes of personal one-on-one contact with the patient, with re-insertion of needle(s)

Evaluation and Management codes are only used for separately identifiable procedures.

99201 Office or other outpatient visit for the evaluation and management of a new patient

99202 Office or other outpatient visit for the evaluation and management of a new patient

99203 Office or other outpatient visit for the evaluation and management of a new patient

99204 Office or other outpatient visit for the evaluation and management of a new patient

99205 Office or other outpatient visit for the evaluation and management of a new patient

99211 Office or other outpatient visit for the evaluation and management of an established patient

99212 Office or other outpatient visit for the evaluation and management of an established patient

99213 Office or other outpatient visit for the evaluation and management of an established patient

99214 Office or other outpatient visit for the evaluation and management of an established patient

99215 Office or other outpatient visit for the evaluation and management of an established patient

The following CPT codes are **contract exclusions** (non-covered):

97813 Acupuncture, 1 or more needles; with electrical stimulation, initial 15 minutes of personal one-on-one contact with the patient

97814 Acupuncture, 1 or more needles; with electrical stimulation, each additional 15 minutes of personal one-on-one contact with the patient, with re-insertion of needle(s)

This medical policy is made available to you for informational purposes only. It is not a guarantee of payment or a substitute for your medical judgment in the treatment of your patients. Benefits and eligibility are determined by the member's subscriber agreement or member certificate and/or the employer agreement, and those documents will supersede the provisions of this medical policy. For information on member-specific benefits, call the provider call center. If you provide services to a member which are determined to not be medically necessary (or in some cases medically necessary services which are non-covered benefits), you may not charge the member for the services unless you have informed the member and they have agreed in writing in advance to continue with the treatment at their own expense. Please refer to your participation agreement(s) for the applicable provisions. This policy is current at the time of publication; however, medical practices, technology, and knowledge are constantly changing. BCBSRI reserves the right to review and revise this policy for any reason and at any time, with or without notice.
