### OVERVIEW

A compression garment (stocking/burn garment/gradient pressure aid garment/sleeve) is a typically fitted elastic support garment which is fabricated to apply varying pressure gradients to an area.

### PRIOR AUTHORIZATION

### POLICY STATEMENT

Compression Garments/stockings are covered when ordered by a physician and obtained from a durable medical equipment provider.

**Note:** A member may be dispensed 8 compression stockings or 4 pairs per 12 months after the initial dispensed compression garment(s)/stocking(s). Please reference the Maximum Units policy for unit limits.

Over the counter (OTC) support hose/stockings/garments (e.g., medical support hose, fabric supports, elastic stockings with no degree of pressure, surgical leggings) are not covered and are member liability.

### COVERAGE

Benefits may vary between groups and contracts. Please refer to the appropriate Benefit Booklet, Evidence of Coverage or Subscriber Agreement for applicable durable medical equipment benefits/coverage.

### BACKGROUND

A compression garment (stocking/burn garment/gradient pressure aid garment/sleeve) is a typically fitted elastic support garment that is fabricated to apply varying pressure gradients to an area. These garments are considered Durable Medical Equipment (DME). They work by relieving stress on vein walls, restoring venous hemodynamics by aiding muscle pump function, decreasing vein reflux, increasing tissue pressures that lead to decreased edema, stimulate circulation, and are also used in varying the treatment of burn patients. Compression stockings/garments require fitting and measuring by a specially trained individual and require a physician order.

Advancements in technology allow many of the compression garments to be pre-made. Very few need to be custom made unless the degree of gradient pressure is one that cannot be provided in a pre-made garment. This type of order can take six to eight weeks. Please note pre-made stockings are not the same as over-the-counter stockings.

Compression stockings over the counter are a lower grade compression and may not be graduated. Prescription stockings are graduated (pressure decreases from ankle up) and are of specific grades of compression. Higher pressure stockings require a prescription and a trained fitter. These higher pressures range typically are from 20-30 mmHg to 50+ mmHg.
