

BCBSRI 5-Tier Formulary (Drug List)*

Effective April 1, 2016 to October 1, 2016

A Reference Guide

INTRODUCTION

Below you'll find the BCBSRI formulary, which is a list of all the prescription drugs covered under your health plan. Our formulary offers a wide range of medications from which to choose and is reviewed periodically by BCBSRI's Pharmacy and Therapeutics Committee. This committee, which is made up of local, community-based practicing physicians and pharmacists, evaluates the medications on the formulary for safety and effectiveness and helps to ensure that BCBSRI members have access to medications that support their health.

CONTROLLING COSTS

The BCBSRI formulary divides covered drugs into five "tiers." Each tier has a corresponding copayment. This allows us to better manage the overall cost of providing prescription drug benefits to our members, while also helping you control what you pay out of pocket for your medications.

We realize that the BCBSRI formulary may not include every drug from every manufacturer. However, choosing medications from the BCBSRI formulary, when appropriate, can provide you with access to the medications you need—at the most affordable cost.

THE FIVE TIERS

- **First Tier:** Includes generic prescription drugs that have the lowest copayment.
- **Second Tier:** Includes generic prescription drugs that have a higher copayment than the first tier.
- **Third Tier:** Includes high-cost generic prescription drugs and preferred brand-name prescription drugs, which have a higher copayment than the second tier.
- **Fourth Tier:** Includes highest cost generic drugs and non-preferred brand name drugs that have a higher copayment than the third tier.
- **Fifth Tier:** Includes specialty prescription drugs that have the highest copayment.

HOW TO USE THE FORMULARY REFERENCE GUIDE

This formulary reference guide lists generic drugs first in each drug category. The preferred brand name products are listed next, and non-preferred brand products are listed last.

PLEASE NOTE: If a generic drug is listed in the “generics” section and its corresponding brand-name product is not listed in the “preferred brand-name” section, then only the generic drug is on the formulary. If a brand name product is listed in the “preferred brand-name” section and its corresponding generic product is not listed in the “generics” section, then a generic version of the medication is not available.

CONSIDERING PREFERRED ALTERNATIVES

This formulary reference guide lists possible preferred alternatives for commonly prescribed non-preferred medications. However, pharmacists cannot substitute a preferred brand-name drug without the prescriber’s approval and will contact the prescriber to obtain authorization to dispense an alternative preferred product when a non-preferred product has been prescribed.

SAVING ON OUT-OF-POCKET COSTS

Your health plan’s prescription drug coverage encourages the use of generic and preferred brand-name drugs. Choosing non-preferred drugs may mean paying higher out-of-pocket expenses (such as coinsurance, copayments, and deductible amounts) or not receiving coverage at all. You will have lower copayments when you use generic drugs. If you use a brand-name drug when there is a generic alternative available, you may be asked to pay the cost difference.

CONSULTING THE PRESCRIBER’S OFFICE WHEN APPROPRIATE

BCBSRI’s formulary may provide coverage only for certain medications or for particular uses, time periods, doses, or quantities (e.g., the formulary may exclude coverage for medications for unapproved, unproven, or cosmetic indications, as well as over-the-counter medications).

When prescription drug coverage is provided based on use or quantity, certain limits may apply. Your prescriber may request an exception based upon your individual circumstances. Contact BCBSRI for additional information to determine whether coverage is available under your plan. Patients who are unsure whether these coverage rules apply for a particular medication can consult their BCBSRI subscriber agreement or contact a BCBSRI member services representative to determine specific coverage requirements.

*Formulary Disclaimer: Coverage for some drugs may be limited to specific dosage forms and/or strengths. Your health plan’s benefit design determines what is covered and the applicable copayment. The medications listed on this formulary are subject to change pursuant to the formulary management activities of BCBSRI. The presence of a medication on this formulary list does not guarantee coverage. Certain therapeutic classes are routinely designated as formulary exclusions and are not eligible for coverage, these classes include Weight Loss, Erectile Dysfunction, Smoking Cessation, OTC status products and drugs with OTC equivalents, Vaccines, products with DESI designations and experimental drugs. Most brand name drugs with generic equivalents are not covered. To see the most up-to-date formulary, please visit your member home page on BCBSRI.com. You may also call Member Services at the number listed on the back of your member ID card.
