

Interactive Account Profile

Your Information, When and Wherever You Need It.

We are proud to introduce the Interactive Account Profile (IAP), a robust online reporting tool that will be available to all employers with more than 100 employees. Now you can get detailed information about your company's health insurance plan online, 24 hours a day!

The IAP is another way in which we can help you understand the cost and utilization drivers impacting your health coverage. Working together, we can make changes to benefits and services that will both improve the health of your employees and, ultimately, help lower your premiums.

Detailed Information, with the Click of a Mouse

On the IAP, you'll find all of the information previously available on the quarterly reports, including:

- Demographics
- Cost
- Utilization
- High-cost analysis
- Preventive measures

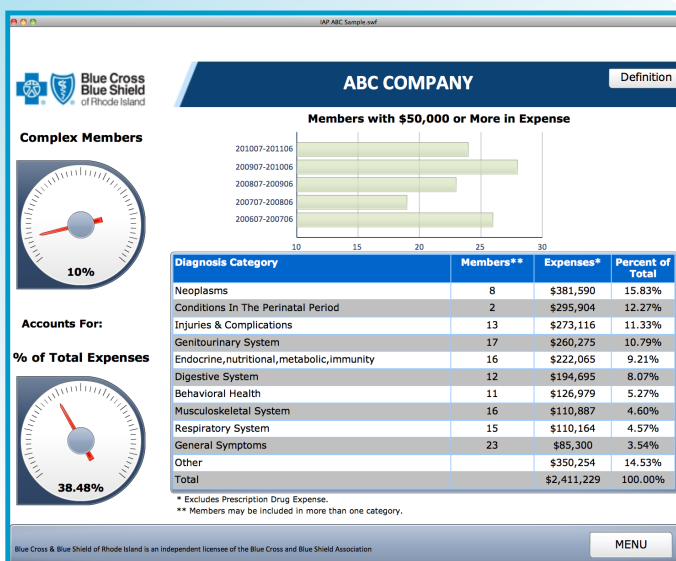

The IAP allows you to drill down into your data for a comprehensive view of your healthcare expenditures and utilization. For example, the demographical information can be viewed both company-wide and at a group level.

How to Get There

To access the IAP, log in to **BCBSRI.com**.

1. Select **Reports**, then **Quarterly Reports**.
2. Select **Interactive Account Profile**.
3. Now you'll see the dates your information was updated. Select the date you want to view information for.
4. The IAP will open in a separate browser window.
