

**EFFECTIVE DATE:** 06|01|2015

**POLICY LAST UPDATED:** 05|19|2015

## OVERVIEW

Artificial intervertebral discs, also referred to total disc replacement or spinal arthroplasty, are proposed as an alternative to fusion in patients with persistent and disabling back pain.

## MEDICAL CRITERIA

Not applicable

## PRIOR AUTHORIZATION

Not applicable

## POLICY STATEMENT

### BlueCHiP for Medicare and Commercial Products

Artificial intervertebral disc replacement for the cervical or lumbar spine is considered not medically necessary due to the lack of peer-reviewed medical literature demonstrating the long-term effectiveness of artificial intervertebral discs.

## COVERAGE

Benefits may vary between groups/contracts. Please refer to the appropriate Evidence of Coverage or Subscriber Agreement for limitations of benefits/coverage when services are not medically necessary.

## BACKGROUND

When conservative treatment of degenerative disc disease fails, a common surgical approach is spinal fusion. Over 200,000 spinal fusions are performed each year. However, the outcomes of spinal fusion have been controversial over the years, in part due to the difficulty in determining whether a patient's back pain is related to degenerative disc disease and in part due to the success of the procedure itself. In addition, spinal fusion alters the biomechanics of the back, potentially leading to premature disc degeneration at adjacent levels, a particular concern for younger patients. As an alternative to fusion, a variety of artificial intervertebral discs have been investigated over the past 30 years. This approach, also referred to as total disc replacement or spinal arthroplasty, is intended to maintain motion at the operative level once the damaged disc has been removed, and to maintain the normal biomechanics of the adjacent vertebrae.

The devices use two metal end plates that are pressed to fit into adjacent vertebrae and a central free component. This central component is held into place by the surrounding normal soft tissues (such as ligaments and the disc annulus), and shifts dynamically within the disc space during spinal motion. These devices are designed to restore disc height and normal physiologic motion.

Evidence to date has not shown a beneficial effect of any cervical disc product on the development of adjacent level disease, whereas long-term complication rates with artificial discs remain unknown. Further, as concluded in the TEC Assessments, given the natural history of the disease, longer-term results are needed, in particular to assess any effect of the device on adjacent-level disc degeneration, device durability, adverse events, and revisability.

## CODING

### BlueCHiP for Medicare and Commercial Products

The following services are considered **not medically necessary** and are not covered for all BCBSRI products:

**0092T** (Code discontinued 12/31/2014)  
**0375T** (New code effective 1/1/2015)  
**22856 22858** (New code effective 1/1/2015)  
**22857 0163T**  
**22861 0098T**  
**22862 0165T**

This medical policy is made available to you for informational purposes only. It is not a guarantee of payment or a substitute for your medical judgment in the treatment of your patients. Benefits and eligibility are determined by the member's subscriber agreement or member certificate and/or the employer agreement, and those documents will supersede the provisions of this medical policy. For information on member-specific benefits, call the provider call center. If you provide services to a member which are determined to not be medically necessary (or in some cases medically necessary services which are non-covered benefits), you may not charge the member for the services unless you have informed the member and they have agreed in writing in advance to continue with the treatment at their own expense. Please refer to your participation agreement(s) for the applicable provisions. This policy is current at the time of publication; however, medical practices, technology, and knowledge are constantly changing. BCBSRI reserves the right to review and revise this policy for any reason and at any time, with or without notice.
