Evaluation of Hearing Impairment/Loss

☐ Device/Equipment  ☐ Drug  ☐ Medical  ☐ Surgery  ☒ Test  ☐ Other

| Effective Date: | 5/17/2007 | Policy Last Updated: | 2/21/2012 |

☐ Prospective review is recommended/required. Please check the member agreement for preauthorization guidelines.

☒ Prospective review is not required.

Description:
Hearing impairment/loss is a reduction in the ability to perceive sound. The loss may range from slight to complete deafness caused by sensorineural and/or conductive hearing losses.

Audiology is a specialty focusing on hearing impairment/loss through identification and evaluation, and the rehabilitation of persons with hearing impairment/loss. Audiological services are normally provided by a licensed audiologist who performs audiometric/diagnostic tests that evaluate both sensorineural and conductive hearing impairment/losses.

The various audiometric/diagnostic tests can be subdivided into:
1. standard batteries that are typically used as part of the initial hearing impairment work-up; and
2. specialized tests that are typically used in specific clinical situations.

The standard batteries vary according to whether the patient is an adult, child, or infant. Tests identified as specialized would not be part of the initial hearing impairment work-up, but may be considered medically necessary when initial diagnostic tests are inconclusive or not appropriate to the specific condition.

The following tests identify standard and specialized audiology tests for adults, children, and infants:

**Standard Battery of Tests for Adults and Children**
1. Pure-tone audiometry, air and bone conduction
2. Speech audiometry
3. Word recognition tests
4. Acoustic reflex test and acoustic reflex decay
5. Tympanometry (impedance testing)
For Children only:
1. Select picture audiometry
2. Conditioning play audiometry

For Infants only:
1. Auditory evoked potential, aka Auditory Brainstem Response (ABR)
2. Visual reinforcement audiometry (VRA)
3. Evoked otoacoustic emissions (OAE)
4. Acoustic reflex test

Specialized Tests for Adults and Children:
1. Auditory Evoked Potential
2. Electrocochleography (ECochG)
3. Tone decay test
4. Stenger test, pure tone or speech
5. Sensorineural acuity level (SAL) test
6. Evoked otoacoustic emissions

Medical Criteria:
Not applicable.

Medical Policy:
The following audiometric tests are considered obsolete and therefore are considered not medically necessary:
1. Lombard test (replaced by the Stenger test and auditory evoked potential)
2. Alternate binaural loudness balance test
3. Short increment sensitivity test (replaced by pure tone audiometry, auditory evoked potential)
4. Bekesy audiometry

All other evaluation of hearing impairment tests are medically necessary.

Coverage:
Benefits may vary between groups/contracts. Please refer to the appropriate Evidence of Coverage, Subscriber Agreement, Benefit Booklet for applicable Diagnostic Imaging, Lab and Machine Tests/Medical Equipment, Medical Supplies and Prosthetic Devices/Office Visit benefits/coverage.

Coding:
The following codes are classified to be processed as covered under the members Diagnostic Imaging, Lab or Machine Tests benefit:

Hearing Tests (routine):
92551 92552
V5008 Hearing screening
Hearing Tests:
92550 92553 92555 92556 92563 92565 92567 92568 92569 92570 92571
92575 92577 92579 92582 92583 92584 92585 92586 92587 92588

The following code is covered for BlueCHiP for Medicare members only under the members Diagnostitic Imaging, Lab and Machine Tests benefit:
92596

The following codes follow the unlisted codes process and documentation must be submitted for review:
92700
V5299 Hearing service, miscellaneous

The following code will be covered under the member's DME benefit and will apply to the hearing aid benefit maximum when the above guidelines are met:
V5020 Conformity evaluation

The following codes are not medically necessary for all product lines:
92559 92560 92561 92562 92564 92572 92576

This medical policy is made available to you for informational purposes only. It is not a guarantee of payment or a substitute for your medical judgment in the treatment of your patients. Benefits and eligibility are determined by the member's subscriber agreement or member certificate and/or the employer agreement, and those documents will supersede the provisions of this medical policy. For information on member-specific benefits, call the provider call center. If you provide services to a member which are determined to not be medically necessary (or in some cases medically necessary services which are non-covered benefits), you may not charge the member for the services unless you have informed the member and they have agreed in writing in advance to continue with the treatment at their own expense. Please refer to your participation agreement(s) for the applicable provisions. This policy is current at the time of publication; however, medical practices, technology, and knowledge are constantly changing. BCBSRI reserves the right to review and revise this policy for any reason and at any time, with or without notice.
