Medical Coverage Policy

Temporary Prostatic Stent

☐ Device/Equipment  ☐ Drug  ☐ Medical  ☒ Surgery  ☐ Test  ☐ Other

☐ Prospective review is recommended/required. Please check the member agreement for preauthorization guidelines.

☒ Prospective review is not required.

Description:

Note: This policy does not address the use of permanent prostatic stents. The policy only addresses temporary stents, which are designed to be removable.

Prostatic obstruction is a common condition with a variety of etiologies. Obstruction may also occur acutely after surgical treatment for benign prostatic hyperplasia (BPH), prostatic cancer, or after radiation therapy. Intraprostatic stenting has been investigated as a short-term treatment option, permitting volitional urination as an alternative to the commonly used Foley catheter, in which urine is collected in an external bag.

In addition to volitional urination, the ideal temporary stent would be one that could be easily inserted and removed without migration, permitting adequate emptying of the bladder without disrupting the external sphincter such that continence could be maintained. The Spanner™ (AbbeyMoor Medical, Parkers Prairie, MN) temporary stent is composed of a proximal balloon to prevent distal displacement, a urine port situated cephalad to the balloon, and a reinforced stent of various lengths to span most of the prostatic urethra. The insertion of this device may be as an outpatient procedure with the patient under topical anesthesia or as an office procedure without anesthesia.

In December 2006, the device “The Spanner™” (AbbeyMoor Medical) was approved by the FDA through the premarket approval process for temporary use (up to 30 days) to maintain urine flow and allow voluntary urination in patients following minimally invasive treatment for BPH and after initial post-treatment catheterization.

Data are inconclusive regarding the role of temporary prostatic stents for prostatic obstructive conditions. This procedure has not been shown to improve the net health outcome. Therefore, the use of temporary prostatic stents is considered not medically necessary for Commercial members as there is no proven efficacy. Temporary prostatic stents are considered medically necessary for BlueCHiP for Medicare members.

Medical Criteria:

None
Policy:

BlueCHiP for Medicare:
Temporary prosthetic stents are medically necessary for BlueCHiP for Medicare members.

Medicare policy is developed separately from BCBSRI policy. Medicare policy incorporates consideration of governmental regulations from CMS (Centers for Medicare and Medicaid Services), such as national coverage determinations or local coverage determinations. In addition to benefit differences, CMS may reach different conclusions regarding the scientific evidence than does BCBSRI. Medicare and BCBSRI policies may differ. However, BlueCHiP for Medicare members must be offered, at least, the same services as Medicare offers.

Commercial:
Temporary prosthetic stents are not medically necessary as there is insufficient peer-reviewed scientific literature that demonstrates that the procedure/service is effective.

Coverage:
Benefits may vary between groups/contracts. Please refer to the appropriate Evidence of Coverage, Subscriber Agreement, or Benefit Booklet for applicable **not medically necessary** benefits/coverage.

Coding:
The following code is considered medically necessary for BlueCHiP for Medicare members only. For all other products it is considered not medically necessary.

53855  Insertion of a temporary prostatic urethral stent, including urethral measurement

Also known as:
The Spanner™

This medical policy is made available to you for informational purposes only. It is not a guarantee of payment or a substitute for your medical judgment in the treatment of your patients. Benefits and eligibility are determined by the member’s subscriber agreement or member certificate and/or the employer agreement, and those documents will supersede the provisions of this medical policy. For information on member-specific benefits, call the provider call center. If you provide services to a member which are determined to not be medically necessary (or in some cases medically necessary services which are non-covered benefits), you may not charge the member for the services unless you have informed the member and they have agreed in writing in advance to continue with the treatment at their own expense. Please refer to your participation agreement(s) for the applicable provisions. This policy is current at the time of publication; however, medical practices, technology, and knowledge are constantly changing. BCBSRI reserves the right to review and revise this policy for any reason and at any time, with or without notice.
