

Dear Provider,

Below you will find a list of CPT® Category II codes. The use of these codes is helpful in documenting and communicating important preventive care services that our members have received while under your care. The codes included on this sheet also close gap in care opportunities as set forth by the National Committee for Quality Assurance (NCQA) via the Healthcare Effectiveness Data and Information Set (HEDIS) performance measures. Additionally, by submitting these codes you can reduce the number of medical record requests that your office receives.

If you have any questions, please contact your Provider Relations representative or email [ProviderRelations@bcbsri.org](mailto:ProviderRelations@bcbsri.org).

Thank you for your continued support and dedication to our members.

Comprehensive Diabetes Care		CPT® Category II codes	Medication Reconciliation Post-Discharge	CPT® Category II code
Diabetic retinal screening with eye care professional		2022F	Discharge medications reconciled with current medications in outpatient record	1111F
Diabetic retinal screening with eye care professional		2024F	<b>Prenatal visit</b>	
Diabetic retinal screening with eye care professional		2026F	Initial prenatal care visit	0500F
HbA1c level less than 7.0		3044F	Prenatal flow sheet documented in medical record by first prenatal visit	0501F
HbA1c level 7.0–9.0		3045F	Subsequent prenatal care visits	0502F
HbA1c level greater than 9.0		3046F	<b>Postpartum Visit</b>	
Positive microalbuminuria test result reviewed and documented		3060F	Postpartum care visit	0503F
Negative microalbuminuria test result reviewed and documented		3061F	<p>CPT® is a registered trademark of the American Medical Association (AMA).
